Subject: Relief Request; ASME Code Case OMN-17, "Alternative Rules for Testing
ASME Class 1 Pressure Relief/Safety Valves"
River Bend Station - Unit 1
License No. NPF-47
Docket No. 50-458

Reference Relief Request; ASME Code Case OMN-17, "Alternative Rules for Testing
ASME Class 1 Pressure Relief/Safety Valves" Dated May 14, 2014, RBG-
47456

Dear Sir or Madam:

In the Reference Entergy submitted a request associated with the Third Ten-Year Inservice Testing Interval. This request is in two parts; first is a general request in accordance with a Code Case to allow an alternate testing frequency of valves and the second is a one-time request to align the currently installed valves to the requested frequency.

After discussions with the NRC staff Entergy has decided to withdraw the second part of this request, Attachment 2. Entergy also requests the review of first part, Attachment 1, continue.

Withdraw of Attachment 2 will not affect the basis or implementation of Attachment 1. Also with the withdraw of Attachment 2 the associated commitment in Attachment 3 of the initial submittal is no longer necessary and is also withdrawn.
