**Definition of a Utilization Facility: Direct Final Rule; 10 Code of Federal Regulations Part 50 (Regulation Identifier Number 3150-AJ18; NRC-2013-0053)**

On October 17, 2014, the NRC published a document in the *Federal Register* ([79 FR 62329](#)) amending its regulations to add SHINE Medical Technologies, Inc.'s proposed accelerator-driven subcritical operating assemblies to the NRC's definition of a "utilization facility." In 2013, SHINE submitted a two-part construction permit application for a medical radioisotope production facility that SHINE proposes to build in Janesville, Wisconsin. This rule allows NRC staff to conduct an efficient and effective licensing review of the SHINE construction permit application and any subsequent operating license application. The companion proposed rule was also published in the *Federal Register* ([79 FR 62360](#)) on October 17, 2014. The final rule is effective on December 31, 2014.

**Issuance of Renewed Operating License for Limerick Generating Station, Units 1 and 2**

On October 20, 2014, the staff issued the renewed operating license for Limerick Generating Station (LGS), Units 1 and 2, authorizing operation for an additional 20 years beyond the original license expiration date. The new expiration dates are October 26, 2044, for Unit 1 and June 22, 2049, for Unit 2. The staff completed its reviews as documented in the Safety Evaluation Report and Supplement 1, NUREG-2171, published September 2014, and the Supplemental Environmental Impact Statement, NUREG-1437, Supplement 49, published in August 2014. The issuance of the LGS renewed licenses brings the total number of renewals to 75 reactor units and is the first renewed license issued since the Commission's approval of a revised rule at 10 CFR 51.23 and associated *Generic Environmental Impact Statement for Continued Storage of Spent Nuclear Fuel*, NUREG-2157.
