

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

November 21, 2014

All Power Reactor Licensees
on the Enclosed List

SUBJECT: RESPONSE REQUIREMENTS FOR REQUEST FOR INFORMATION
PURSUANT TO TITLE 10 OF THE *CODE OF FEDERAL REGULATIONS*
50.54(f) REGARDING FLOODING HAZARD INTEGRATED ASSESSMENTS
FOR RECOMMENDATION 2.1 OF THE NEAR-TERM TASK FORCE
REVIEW OF INSIGHTS FROM THE FUKUSHIMA DAI-ICHI ACCIDENT

The U. S. Nuclear Regulatory Commission (NRC, the Commission) is in the process of reevaluating its approach to address Near-Term Task Force (NTTF) Recommendation 2.1, Flooding. Therefore, the NRC is extending the due date for licensees to respond to the request for Integrated Assessment Reports. The extension is, in part, to allow the staff to receive Commission direction pertaining to the integration of mitigating strategies for beyond design basis external events and the reevaluation of flooding hazards.

Integrated Assessment Reports are requested for sites whose reevaluated flood hazard exceeds the current design basis. These sites are also requested to provide an interim action plan which describes actions taken or planned prior to completion of the integrated assessment to address any reevaluated flood hazards that exceeds the current design basis. The interim action plans provide an additional level of protection beyond the plant's design basis. Therefore, additional actions have been, and will be, identified and implemented as necessary, to address beyond design basis flooding hazards.

BACKGROUND

On March 12, 2012, the NRC issued a request for information pursuant to Title 10 of the *Code of Federal Regulations*, Part 50, Section 54(f) (hereafter referred to as the 50.54(f) letter). The purpose of that request was to gather sufficient information to enable the NRC staff to determine whether the nuclear plant licenses should be modified, suspended, or revoked.

Enclosure 2 of the 50.54(f) letter, "Required Response," item 3, requests that Integrated Assessment Reports be submitted within 2 years following the submittal of a Flooding Hazard Reevaluation Report (FHRR). The initial FHRRs were submitted in March of 2013. Therefore, the initial Integrated Assessment Reports for these facilities are due March of 2015. The staff is currently still reviewing the FHRRs that were submitted in March 2013. The flood parameters developed in the FHRR are used as the basis for completing the requested Integrated Assessment Report. The NRC staff acknowledges that finality, as documented in the staff's assessment, on the flood parameters developed in the FHRR is essential for completing the Integrated Assessment Report.

Additionally, the NRC staff has conducted public meetings with industry representatives to discuss the relationship between mitigating strategies for beyond-design-basis external events and the reevaluation of flooding hazards being performed as part of NTTF Recommendation 2.1. These meetings held on August 21, 2014 (meeting summary is available in the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML14251A565) and September 18, 2014 (meeting summary is available in ADAMS at Accession No. ML14275A012). This topic was also discussed during the September 23, 2014, meeting between the industry and NRC steering committees for activities related to lessons learned from the Fukushima Dai-ichi accident. As discussed in these meetings, the staff is preparing a Commission paper regarding the staff's planned actions for the hazard reevaluations, Order EA-12-049 (Mitigation Strategies), and the beyond-design-basis external events related rulemaking. The Commission's direction resulting from the paper will determine whether additional guidance or changes in existing guidance is necessary.

DEFERRAL OF INFORMATION REQUEST

Based on the above considerations, the staff is extending the request to provide the Integrated Assessment Report within 2 years of the FHRR submittal by 6 months for sites that submitted an FHRR prior to June 2013. The NRC expects to provide clarification to licensees on future submittals, including schedules, after receiving further direction from the Commission.

If you have any questions on this matter, please contact Mr. Robert Kuntz at (301) 415-3733 or Robert.Kuntz@nrc.gov.

Sincerely,

William M. Dean, Director
Office of Nuclear Reactor Regulation

Burlington, KS 66839

Additionally, the NRC staff has conducted public meetings with industry representatives to discuss the relationship between mitigating strategies for beyond-design-basis external events and the reevaluation of flooding hazards being performed as part of NTTF Recommendation 2.1. These meetings were held on August 21, 2014 (meeting summary is available in the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML14251A565) and September 18, 2014 (meeting summary is available in ADAMS at Accession No. ML14275A012). This topic was also discussed during the September 23, 2014, meeting between the industry and NRC steering committees for activities related to lessons learned from the Fukushima Dai-ichi accident. As discussed in these meetings, the staff is preparing a Commission paper regarding the staff's planned actions for the hazard reevaluations, Order EA-12-049 (Mitigation Strategies), and the beyond-design-basis external events related rulemaking. The Commission's direction resulting from the paper will determine whether additional guidance or changes in existing guidance is necessary.

DEFERRAL OF INFORMATION REQUEST

Based on the above considerations, the staff temporarily defers the request to provide the Integrated Assessment Report within 2 years of the FHRR submittal. The NRC expects to provide clarification to licensees on future submittals, including schedules, after receiving further direction from the Commission.

If you have any questions on this matter, please contact Mr. Robert Kuntz at (301) 415-3733 or Robert.Kuntz@nrc.gov.

Sincerely,
/RA/
William M. Dean, Director
Office of Nuclear Reactor Regulation
