SUBJECT: SUMMARY OF OCTOBER 30, 2014 PUBLIC MEETING TO
CONTINUE DISCUSSIONS BETWEEN THE NRC AND
INDUSTRY RISK-INFORMED STEERING COMMITTEES

On October 30, 2014, the U.S. Nuclear Regulatory Commission (NRC) staff held a Category 2 public meeting to continue discussions between the NRC and industry risk-informed steering committees (RISC). The purpose of the meeting was to engage the industry and public in a discussion of the progress of the issues being addressed by the working groups formed by the RISC's.

The leads of the two NRC working groups provided presentations on the accomplishments and the status of the issues. These included actions completed, public meetings held, planned interactions with the industry working groups in the future, and proposed due dates for deliverables. Both working group leads reported that significant progress has been made, but there is still much work to be completed. The group leads expressed some concern on meeting the deliverables due dates, but are working toward that goal. The NRC probabilistic risk assessment (PRA) Technical Adequacy working group's presentation is available in the Agencywide Documents Access and Management System (ADAMS) Accession Number ML14304A430. The NRC Treatment of Uncertainty in Decision Making working group's presentation is available in ADAMS Accession Number ML14304A433. The industry's PRA Technical Adequacy working group lead also gave a presentation. That presentation is available in ADAMS Accession Number ML14304A436. The remainder of the discussion was focused on the next meeting. The RISC's decided that the primary goal of the next meeting would be to discuss topics for 2015. The next public meeting is scheduled for December 17, 2014.
