Subject: Change to Radiation Safety Officer and amending maximum amount of source material

License # 06-19279-01

Fairfield Testing Laboratory, License # 06-19279-01, is looking to update its Radiation Safety Officer, RSO. The previous RSO on the application, Sebastlan Corbin, is no longer employed at Fairfield Testing Laboratory. We would like to amend the license to make Dennis Kielely our new RSO. He has successfully completed the training for the Fundamentals of Safety and Gage operation, for the use of nuclear moisture/density equipment, through Q/C Resource. His certificate number is 13388 and will be provided with this letter.

We would also like to amend our Materials License to increase the total amount of Cesium 137 and Americium 241 we may possess. Currently our Cesium 137 is at 100 millicuries and would like to increase this to 110 millicuries. Our Americium 241 is currently at 400 millicuries and we would like to increase this to 550 millicuries. This will allow Fairfield Testing Laboratory to have more density gages and allow us to take on more jobs.

Thank you,

James Quill
