Hi Shawn,

GL-704687 is a general licensee (GL) from the Department of Navy. The NRC usually receives a notification from the NAVY that the devices were transferred to their Master Materials License (MML). We have not received any kind of notification for this GL. This GL possesses devices that require registration. We are in the process of sending letters to GLs with the annual registration form for 2015.

We would like to know if these devices were transferred to their MML or if we should move forward and send them the registration form and the invoice with the annual fee. Below is information regarding this licensee. If you have any questions please let me know. Thank you very much for your help.

Hector,

Could you please review this GL. Usually Navy devices are transferred to their Master Materials License. It looks like we have not received a transfer notification. Did you want to follow-up with the Navy or shall we send the registration?

Thanks,

Chris
