Re: Amendment to License No. 21-18585-01

1. Please remove an additional address of use in item 10 C from our license.

The address is:

Saginaw Radiation Oncology Facility
4141 Tittabawassee Road
Saginaw, MI

This location is no longer part of our oncology group. The mobile High Dose Rate Remote Afterloader (HDR unit) that was licensed for use at this location will now be used only at the remaining location given on the license. It has been removed from the Saginaw site as of 10-31-2014 along with related hardware, making it unusable at the Saginaw location in the future.

We would like to further state that during both source exchanges and daily use there has never been any events that resulted in any residual radiation left at the location of use. Room surveys were always performed after each patient treatment. The HDR unit, being mobile, has always had a wipe test done on the transporting vehicle after the device has been moved to a new location.

If you have any questions regarding this matter, please contact our Medical Physicist, Dennis Kehoe, M.S., at 989-667-6675 and / or dennis.kehoe@mcclaren.org.

Sincerely,

A handwritten signature in cursive script, appearing to read "Ellen Talbott".

Ellen Talbott, Vice President Patient Care Services
