§40.36(g)	Financial assurance and recordkeeping for decommissioning.	D	N/A	N/A	N/A
§ 40.46	Inalienability of licenses.	C	<b>In §40.46, the current paragraph is designated as paragraph (a) and a new paragraph (b) is added to read as follows:</b> (b) An application for transfer of license must include: (1) The identity, technical and financial qualifications of the proposed transferee; and (2) Financial assurance for decommissioning information required by §40.36 or Appendix A to this part, as applicable.	NO	<b>Washington is proposing to adopt these changes in WAC 246-235-075(6)(a)(i) and (ii).</b>
Appendix A to Part 40 Criterion 9	Criteria Relating to the Operation of Uranium Mills and the Disposition of Tailings or Wastes Produced by the Extraction or Concentration of Source Material from Ores Processed Primarily for Their Source Material Content	C	<b>In Appendix A to Part 40, Section II, Criterion 9 is revised to read as follows:</b> (a) Financial surety arrangements must be established by each mill operator before the commencement of operations to assure that sufficient funds will be available to carry out the decontamination and decommissioning of the mill and site and for the reclamation of any tailings or waste disposal areas. The amount of funds to be ensured by such surety arrangements must be based on Commission-approved cost estimates in a Commission-approved plan, or a proposed revision to the plan submitted to the Commission for approval, if the proposed revision contains a higher cost estimate, for (1) Decontamination and decommissioning of mill buildings and the milling site to levels which allow unrestricted use of these areas upon decommissioning, and (2) The reclamation of tailings and/or waste areas	NO	<b>Washington is proposing to adopt these changes in WAC 246-252-030(9).</b>

Change to NRC Section	Title	Compatibility Category	Summary of Change to CFR	Different Yes/No	Comment and State Section
			<p>in accordance with technical criteria delineated in Section I of this appendix.</p> <p>(b) Each cost estimate must contain–</p> <p>(1) A detailed cost estimate for decontamination, decommissioning, and reclamation, in an amount reflecting:</p> <p>(i) The cost of an independent contractor to perform the decontamination, decommissioning and reclamation activities; and</p> <p>(ii) An adequate contingency factor;</p> <p>(2) An estimate of the amount of radioactive contamination in onsite subsurface material;</p> <p>(3) Identification of and justification for using the key assumptions contained in the DCE; and</p> <p>(4) A description of the method of assuring funds for decontamination, decommissioning, and reclamation.</p> <p>(c) The licensee shall submit this plan in conjunction with an environmental report that addresses the expected environmental impacts of the milling operation, decommissioning and tailings reclamation, and evaluates alternatives for mitigating these impacts. The plan must include a signed original of the financial instrument obtained to satisfy the surety arrangement requirements of this criterion (unless a previously submitted and approved financial instrument continues to cover the cost estimate for decommissioning). The surety arrangement must also cover the cost estimate and the payment of the charge for long-term surveillance and control required by Criterion 10 of this section.</p> <p>(d) To avoid unnecessary duplication and expense, the Commission may accept financial sureties that have been consolidated with financial or surety arrangements established to meet requirements of other Federal or state agencies and/or local governing bodies for decommissioning, decontamination, reclamation, and long-term site</p>		

Change to NRC Section	Title	Compatibility Category	Summary of Change to CFR	Different Yes/No	Comment and State Section
			<p>surveillance and control, provided such arrangements are considered adequate to satisfy these requirements and that the portion of the surety which covers the decommissioning and reclamation of the mill, mill tailings site and associated areas, and the long-term funding charge is clearly identified and committed for use in accomplishing these activities.</p> <p>(e) The licensee's surety mechanism will be reviewed annually by the Commission to assure, that sufficient funds would be available for completion of the reclamation plan if the work had to be performed by an independent contractor.</p> <p>(f) The amount of surety liability should be adjusted to recognize any increases or decreases resulting from:</p> <ol style="list-style-type: none"> <li>(1) Inflation;</li> <li>(2) Changes in engineering plans;</li> <li>(3) Activities performed;</li> <li>(4) Spills, leakage or migration of radioactive material producing additional contamination in onsite subsurface material that must be remediated to meet applicable remediation criteria;</li> <li>(5) Waste inventory increasing above the amount previously estimated;</li> <li>(6) Waste disposal costs increasing above the amount previously estimated;</li> <li>(7) Facility modifications;</li> <li>(8) Changes in authorized possession limits;</li> <li>(9) Actual remediation costs that exceed the previous cost estimate;</li> <li>(10) Onsite disposal; and</li> <li>(11) Any other conditions affecting costs.</li> </ol> <p>(g) Regardless of whether reclamation is phased through the life of the operation or takes place at the end of operations, an appropriate portion of surety liability must be retained until final compliance with the reclamation plan is determined.</p>		

Change to NRC Section	Title	Compatibility Category	Summary of Change to CFR	Different Yes/No	Comment and State Section
			<p>(h) The appropriate portion of surety liability retained until final compliance with the reclamation plan is determined will be at least sufficient at all times to cover the costs of decommissioning and reclamation of the areas that are expected to be disturbed before the next license renewal. The term of the surety mechanism must be open ended, unless it can be demonstrated that another arrangement would provide an equivalent level of assurance. This assurance would be provided with a surety instrument which is written for a specified time (e.g., 5 years) and which must be automatically renewed unless the surety notifies the beneficiary (the Commission or the State regulatory agency) and the principal (the licensee) with reasonable time (e.g., 90 days) before the renewal date of their intention not to renew. In such a situation the surety requirement still exists and the licensee would be required to submit an acceptable replacement surety within a brief time to allow at least 60 days for the regulatory agency to collect.</p> <p>(i) Proof of forfeiture must not be necessary to collect the surety. In the event that the licensee cannot provide an acceptable replacement surety within the required time, the surety shall be automatically collected before its expiration. The surety instrument must provide for collection of the full face amount immediately on demand without reduction for any reason, except for trustee fees and expenses provided for in a trust agreement, and that the surety will not refuse to make full payment. The conditions described previously would have to be clearly stated on any surety instrument which is not open-ended, and must be agreed to by all parties. Financial surety arrangements generally acceptable to the Commission are:</p> <p>(1) Trust funds;</p>		

Change to NRC Section	Title	Compatibility Category	Summary of Change to CFR	Different Yes/No	Comment and State Section
			(2) Surety bonds; (3) Irrevocable letters of credit; and (4) Combinations of the financial surety arrangements or other types of arrangements as may be approved by the Commission. If a trust is not used, then a standby trust must be set up to receive funds in the event the Commission or State regulatory agency exercises its right to collect the surety. The surety arrangement and the surety or trustee, as applicable, must be acceptable to the Commission. Self insurance, or any arrangement which essentially constitutes self insurance (e.g., a contract with a State or Federal agency), will not satisfy the surety requirement because this provides no additional assurance other than that which already exists through license requirements.
