**Definition of a Utilization Facility: Direct Final and Proposed Rule; Correction; 10 Code of Federal Regulations Part 50 (Regulation Identifier Number (RIN) 3150-AJ48; NRC-2014-0238)**

On November 5, 2014, the NRC published corrections to direct final ([79 FR 65541](#)) and companion proposed rules ([79 FR 65603](#)) to correct the docket identification number and RIN for rules previously published in the *Federal Register* on October 17, 2014. The direct final rule ([79 FR 62329](#)) would amend the NRC's regulations to add SHINE Medical Technologies, Inc.'s accelerator-driven subcritical operating assemblies, as described in the application assigned docket number 50-608, to the definition of utilization facility. The final rule will be effective December 31, 2014, unless significant adverse comments are received on the companion proposed rule ([79 FR 62360](#)) by November 17, 2014. The corrections were effective November 5, 2014.

On November 5, 2014, the staff published the final rule to amend Title 10 of the *Code of Federal Regulations*, Sections 50.54, 50.55, and 50.55a, to incorporate by reference the latest revisions of the following three previously incorporated regulatory guides (RG) that approve code cases published by the ASME: RG 1.84, "Design, Fabrication, and Materials Code Case Acceptability, ASME Section III," Revision 36; RG 1.147, "Inservice Inspection Code Case Acceptability, ASME Section XI, Division 1," Revision 17; and RG 1.192, "Operation and Maintenance Code Case Acceptability, ASME OM [Operation and Maintenance Code]," Revision 1. This rulemaking also allows requests that alternatives to NRC-approved ASME Boiler and Pressure Vessel and OM Code Cases be approved by the NRC. This change resolves a petition for rulemaking, PRM 50-89, submitted by Mr. Raymond West.
