Re: Request for License Amendment, License Number: 20-27648-01

Dear Licensing Assistance Team,

GeoTesting Express would like to name a new Radiation Safety Officer (RSO). Currently I function in this role and propose Mike Driscoll as my replacement. Mike has worked for GeoTesting Express for 14 years performing field compaction control testing (using a nuclear density gauge) and laboratory testing. He has extensive experience with both Troxler and Seaman manufactured gauges. In addition, he has completed Troxler's Radiation Safety Officer Training course. Mike has completed OSHA's 40 hour safety training and maintains current annual 8-hour refresher courses. Mike also maintains current the DOT's training for transporting nuclear density gauges (renewable every three years). Mike has assisted me in maintaining all of our documentation, procedures, monitoring and record keeping for nuclear density gauges for at least seven years. He has complete familiarity and experience with all this position requires. This makes him the perfect fit as my successor as RSO. Attached is a copy of Mike's RSO training certificate.

Please call or e-mail me if you have any questions or require additional information. I may be reached by telephone directly at 978-893-1229 or by e-mail at [gtt@geotesting.com](mailto:gtt@geotesting.com). Thank you.

Respectfully yours,

Gary T. Torosian  
Vice President and  
Director of Testing Services
