WHEREAS, a public hearing of the Board of County Commissioners was advertised and held, as required by the Zoning Procedure Ordinance, and all interested parties concerned in the matter were given an opportunity to be heard, and

WHEREAS, this Board has been advised that the subject application has been reviewed for compliance with concurrency requirements for levels of services and, at this stage of the request, the same was found to comply with the requirements, and

WHEREAS, upon due and proper consideration having been given to the matter and to the Developmental Impact Committee, it is the opinion of this Board that the requested unusual use to permit a reclaimed water treatment facility and radial collector well system ancillary to a previously approved nuclear power plant, as the request pertains to the alternate reclaimed water treatment facility site on Parcel A (Item #1), the requested unusual use to permit parking located in a zone more restrictive than the use it serves on Parcel A (Item #2), the requested non-use variance of zoning regulations requiring section line rights-of-way to be 80' in width; to waive same to permit 0' of dedication for portions of SW 87

Avenue and 97 Avenue between SW 360 Street and SW 344 Street; SW 344 Street between 97 Avenue and the Levee 31 East Canal right-of-way; and SW 360 Street between SW 87 Avenue and the Levee 31 East Canal right-of-way and to waive the zoning regulations requiring half section line rights-of-way to be 70' in width, to permit 0' of dedication for portions of SW 352 Street between SW 87 Avenue and the Levee 31 East Canal right-of-way; and portions of SW 82 Avenue and SW 92 Avenue between SW 352 Street and SW 360 Street on Parcel A (Item #3), the requested non-use variance to permit building heights of 75' on Parcel A (Item #4), the requested non-use variance to permit a fence height of 12' on Parcel A (Item #5), the requested special exception to permit fences with multiple strands of barbed wire in the GU zone on Parcel A (Item #6), the requested non-use variance to waive the landscape regulations requiring 9 trees per acre and 10 shrubs for every tree required to be installed on the subject property; to permit same to be planted offsite on Parcel A (Item #6), the requested non-use variance to waive the landscape regulations requiring 9 trees per acre and 10 shrubs for every tree required to be installed on the subject property; to permit same to be planted offsite on Parcel A (Item #7), the requested modification of Condition #4 of Resolution Z-56-07 on Parcel A (Item #8), and the requested modification of Condition #1 of Resolution 4-ZAB-559-71, last modified by Resolution Z-56-07 on Parcels A and B (Item #9) would be compatible with the area and its development and would be in harmony with the general purpose and intent of the regulations and would conform with the requirements and intent of the Zoning Procedure Ordinance and would be consistent with the Comprehensive Development Master Plan, and that the requested unusual uses (Items #1 and #2) and the requested special exception (Item #6) would not have an adverse impact upon the public interest and should be approved, and

WHEREAS, a motion to bifurcate, and to approve a portion of Items #1 and #9 only as it pertains to the alternate reclaimed water treatment facility site and to approve Items #4, #5, and #6, subject to conditions, was offered by Commissioner Dennis C. Moss, seconded by Commissioner Jose "Pepe" Diaz, and upon a poll of the members present the vote was as follows:

NOW THEREFORE BE IT RESOLVED by the Board of County Commissioners, Miami-Dade County, Florida, that the requested unusual use to permit a reclaimed water treatment facility site on Parcel A, as the request pertains to the alternate reclaimed water treatment facility site, and radial collector well system ancillary to a previously approved nuclear power plant (Item #1), the requested unusual use to permit parking located in a zone more restrictive than the use it serves on Parcel A (Item #2), the requested non-use

variance of zoning regulations requiring section line rights-of-way to be 80' in width; to waive same to permit 0' of dedication for portions of SW 87 Avenue and 97 Avenue between SW 360 Street and SW 344 Street; SW 344 Street between 97 Avenue and the Levee 31 East Canal right-of-way; and SW 360 Street between SW 87 Avenue and the Levee 31 East Canal right-of-way and to waive the zoning regulations requiring half section line rights-of-way to be 70' in width, to permit 0' of dedication for portions of SW 352 Street between SW 87 Avenue and the Levee 31 East Canal right-of way; and portions of SW 82 Avenue and SW 92 Avenue between SW 352 Street and SW 360 Street on Parcel A (Item #3), the requested non-use variance to permit building heights of 75' on Parcel A (Item #4), the requested non-use variance to permit a fence height of 12' on Parcel A (Item #5), the requested special exception to permit fences with multiple strands of barbed wire in the GU zone on Parcel A (Item #6), the requested non-use variance to waive the landscape regulations requiring 9 trees per acre and 10 shrubs for every tree required to be installed on the subject property; to permit same to be planted offsite on Parcel A (Item #6), the requested non-use variance to waive the landscape regulations requiring 9 trees per acre and 10 shrubs for every tree required to be installed on the subject property; to permit same to be planted offsite on Parcel A (Item #7), the requested modification of Condition #4 of Resolution Z-56-07 on Parcel A (Item #8), And the requested modification of Condition #1 of Resolution 4-ZAB-559-71, last modified by Resolution Z-56-07, as it pertains to the radial collector well system and as it pertains to the alternate water treatment facility site on Parcels A and B be and the same are hereby approved, subject to the following conditions:

1. That all the conditions of Resolution No. 4-ZAB-559-71 and Z-56-07 remain in full force and effect, except as herein modified.
2. That an unobstructed utility easement to the Miami-Dade Water and Sewer Department be provided along SW 360 Street from SW 117 Avenue to the Turkey Point facility.

Radial Collector Well Conditions:

Except for Parcel "A", FPL shall not apply for any water withdrawals from the Biscayne Aquifer as a primary source of cooling water for Nuclear Units 6 & 7. In Parcel "A", FPL shall not apply for any water withdrawals from the Biscayne Aquifer for a primary source of cooling water for Nuclear Units 6 & 7.

- 3 FPL shall submit a Radial Collector Well Field Monitoring Plan to Miami-Dade County RER-DERM for review and approval. FPL shall modify the Radial Collector Well Monitoring Plan as required for approval by Miami-Dade County RER-DERM so that the monitoring plan provides information reasonably necessary for the County's evaluation of the project's compliance with requirements of Chapter 24 of the Code of Miami-Dade County and conditions of the unusual use approval. FPL shall implement the plan as approved. The purpose of the Radial Collector Well Monitoring Plan is to confirm that no adverse impacts occur to the Biscayne Aquifer and to ecological or water resources in the surrounding wetlands and bay areas resulting from the operation of the Radial Collector Well system. The Radial Collector Well Monitoring Plan shall include an initial start-up testing component for the first completed caisson and radial well collector array and a subsequent full scale testing component after completion of the entire well field, as well as a long term monitoring component for evaluating operation of the full scale Radial Collector Well system.
4. The Radial Collector Well Monitoring Plan shall also include timelines and a reporting component, and shall include Monthly Operating Reports. FPL shall collect and analyze hydrologic and water quality data generated from the Radial Collector Well Monitoring Plan each time the radial collector well field is operated as a backup source of cooling water and shall provide both the monitoring data (in electronic format), and a report analyzing the data to Miami-Dade County RER-DERM within 120 days after the event monitoring has ceased. If the monitoring indicates adverse impacts to either ecological or water resources, FPL shall be required to take action to correct and adequately abate such impacts. Corrective action shall be approved by Miami-Dade County RER-DERM prior to implementation.
5. Initial start-up testing of the first completed well shall consist of a minimum of 72 hours pumping at the average expected single caisson pumping rate for full Radial Collector Wellfield operations and shall include hydrologic and water quality monitoring before, during and after pumping until full recovery of the surrounding area is demonstrated. The Radial Collector Well Monitoring Plan shall include measuring the pumping rate and flows from individual laterals, seepage (either by meters installed in the bay bottom substrate or an alternative approved method). The purpose of this initial 72 hour pump testing is : 1) to confirm information provided on aquifer characteristics and modeling predictions submitted by FPL in this application as they relate to the causal effects on water resources, and 2) to use these data to correct or improve the model as necessary to ensure accurate simulation of conditions and impacts including predictive ability of the model.

6. Subsequent to the 72 hour pumping test, initial full scale testing of the first completed well shall consist of a 30 day pumping period at the average expected single caisson pumping rate for full Radial Collector Wellfield operations. The Radial Collector Well Monitoring Plan shall include measuring the pumping rate and flows from individual laterals, seepage (either by meters installed in the bay bottom substrate or an alternative approved method). The purpose of this 30 day pump testing is to: 1) to generate sufficient hydrologic and water quality data to confirm that one well operating at full capacity would not result in adverse impacts to the Biscayne Aquifer or to ecological or water resources in the surrounding wetlands or bay areas resulting from the operation of the well field and to confirm information provided on aquifer characteristics and modeling predictions submitted by FPL in this application as they relate to the causal effects on water resources, and 2) to inform the design or further refinement in design of the long term component of the Radial Collector Well monitoring based on the data generated from the initial start-up testing phase and 3) to verify the amount of time necessary for full recovery of the aquifer and surrounding water bodies after this initial test and 4) to use these data to correct or improve the model as necessary to ensure accurate simulation of conditions and impacts including predictive ability of the model. The long term monitoring component shall generate sufficient hydrologic and water quality data necessary to evaluate and confirm that full scale operation of the Radial Collector Well would not result in adverse impacts to the Biscayne Aquifer or to ecological or water resources in the surrounding wetlands or bay areas and to confirm aquifer characteristics and modeling predictions submitted in the application as they relate to the causal effects on these water resources, and to provide actual data at a scale sufficient to verify output of the model required as part of Zoning Resolution Z-56-07.
7. FPL shall analyze Radial Collector Well Monitoring Plan data using appropriate groundwater hydraulic techniques. FPL shall use the data from the initial start up testing and configure the existing groundwater model (originally calibrated parameters and boundary conditions) to simulate the full scale radial collector well operation using recorded pumping rates and lateral distributions generated from the initial start-up testing. The modeled steady-state drawdowns shall be compared to observed steady state drawdowns to confirm the accuracy of the original model. If necessary, the model will then be recalibrated (by parameter and boundary condition adjustment) to approximate drawdowns observed during the full scale test. The recalibrated model will then be run to confirm the conclusions of the original model.
8. The maximum number of days the Radial Collector Wells may be operated for cooling water purposes shall be the number of days approved by the South Florida Water Management District (SFWMD) or the Florida Department of Environmental Protection (DEP), as applicable. FPL shall notify Miami-Dade County RER-DERM of any request or application to change the number of days approved for radial collector well operation and provide information and data to support the request.

9. Notwithstanding any other condition associated with this zoning approval and pursuant to Section 24-27 of the Miami-Dade County Code, FPL shall not cause, or allow to be caused, any nuisance as defined in Section 24-5 and/or 24-28 by operation of the radial collector well field.
10. FPL shall monitor the quality and quantity of the reuse/reclaimed water provided by Miami-Dade County. FPL shall maintain documentation including but not limited to laboratory analysis and any other monitoring data. If monitoring indicates that the quality or the quantity of the reclaimed water has decreased to the point where it no longer meets the thresholds defined in paragraph 3.3.2 of the Joint Participation Agreement signed by both Miami-Dade County and FPL (R-813-1 0) or successor agreements, FPL shall provide notification to Miami-Dade County WASD within 24 hours of such a determination. FPL shall maintain all records relating to this monitoring for review by Miami-Dade County and provide such records within 30 days upon request. FPL shall utilize reclaimed water as the primary source of cooling water, when available in sufficient quantities and quality as defined by Paragraph 3.3.2 of the Joint Participation Agreement.
11. FPL shall submit Monthly Operating Reports to Miami-Dade County RER-DERM with monitoring requirements specific to the well field operations (i.e. idle, maintenance, and actual operation). Submittal of a Monthly Operating Report shall be required whether or not the wells have been operated in any particular month. Each Monthly Operating Report shall provide monthly groundwater data, including volume extracted and water quality data. The water quality parameters to be included in the Monthly Operating Reports shall be approved by Miami-Dade County RER-DERM.
12. Construction of the radial collector wells, including but not limited to dewatering activities, shall not result in violation of the water quality standards set forth in Section 24-42(4) of the Code of Miami-Dade County. Construction activities, including but not limited to de-watering, shall be in compliance with applicable water quality standards and such project activities shall not cause a nuisance or sanitary nuisance as defined pursuant to Miami-Dade County Code Sections 24-27 and 24-28. All dewatering associated with the construction of the radial collector wells shall be directed to the cooling canals or to approved deep injection wells unless otherwise approved by Miami-Dade County RER-DERM; discharges of any kind to wetlands or Biscayne Bay are prohibited without prior written approval from Miami-Dade County RER-DERM.

Non-Use Variance request 3, Waive dedication requirements for section line roads:

13. FPL shall provide Miami-Dade County with an easement along section line road right of way on the SW 344 Street alignment east of Levee L-31 for purposes consistent with public land management, monitoring, and restoration activities, within ninety (90) days of BCC approval of this application and prior to any work on FPL's property related to this application, including any preconstruction work such as earthwork or clearing. All work under this approval including preconstruction

earthwork and clearing is prohibited unless the subject easement has been approved and accepted by Miami-Dade County.

Non-Use Variance request 7, To Permit Landscaping to be planted offsite:

14. All landscape material that will not be planted at the subject property shall be planted at off-site locations approved by Miami-Dade County RER-DERM and the Parks Recreation and Open Spaces Department. All material to be planted off-site shall be native material appropriate to the planting area as verified by Miami-Dade County RER-DERM and shall be Florida Landscape Grade A. Half of the required material shall be planted at a site or sites selected by the Parks Recreation and Open Spaces Department, the remaining half shall be planted at a Miami-Dade County RER-DERM selected site(s) for purposes of environmental enhancement or restoration. Plans shall be submitted to Miami-Dade County RER-DERM and the Parks Recreation and Open Spaces Department for approval. All materials shall be planted within the timeframes specified by Miami-Dade County RER-DERM and the Parks Recreation and Open Spaces Department.

General Conditions applicable to all requests:

15. For all work approved under this application that involves impacts to wetlands, FPL shall submit a mitigation plan that is fully consistent with the CDM and Miami-Dade County Code, including but not limited to the avoidance, minimization and preservation requirements of Section 24-48.4 Miami-Dade County Code. As a component of this mitigation plan, FPL shall also include provision for submittal of a restrictive covenant or an equivalent legal instrument to protect and maintain the wetlands areas to be preserved, and said legal instrument must be consistent with the Miami-Dade County's preservation requirements for mitigation. FPL shall submit an approvable mitigation plan to Miami-Dade County RER-DERM within ninety (90) days of BCC approval of this application and prior to any work on FPL's property related to this application, including any preconstruction work such as earthwork or clearing. All work under this approval including preconstruction earthwork and clearing is prohibited unless the mitigation plan has been approved by Miami-Dade County RER-DERM. All mitigation shall be implemented consistent with the Miami-Dade County approved plan.
16. FPL shall prepare and submit to Miami-Dade County RER-DERM, within ninety (90) days of BCC approval, an earthwork and materials disposal plan. This plan shall be developed in accordance with the substantive requirements of Chapter 24, Miami-Dade County Code and shall be reviewed by RER-DERM for compliance with Chapter 24 as interpreted by RER-DERM based upon the impacts of this application. The applicant will modify the plan as needed to satisfy compliance with Chapter 24 and to obtain approval. The plan will include at a minimum the various types of earthwork, methods for testing/characterization of disposal materials, identification of any potential on-site and off-site disposal sites, and a description of all best management practices to be used to prevent spoil materials stored at the proposed disposal sites from eroding and adversely impacting adjacent wetland areas or surface waters or disrupting habitat utilized by federal or state designated threatened

or endangered plant or animal species. Any spoil material proposed to be stored in the vicinity of sensitive ecological areas such as wetlands or surface waters must be demonstrated to the satisfaction of Miami-Dade County RER-DERM, through appropriated sampling methodology and laboratory analysis, to be free of any contaminants that can adversely impact these sensitive areas. Work shall not commence until the required plan has been approved by Miami-Dade County RER-DERM.

17. Only clean fill, free from contamination shall be used for construction pursuant to the applicable sections of Chapter 24, Miami-Dade County Code for all work approved under this application.
18. FPL shall prepare a management plan for all federal and state listed, threatened, or endangered species that could be directly or indirectly impacted by the work authorized under this zoning request. Miami-Dade County RER-DERM will review the plan for consistency with substantive requirements of applicable statutes and regulations and FPL will revise the plan in a timely manner to obtain RER-DERM approval. All work including preconstruction earthwork and clearing is prohibited unless the management plan has been approved by RER-DERM. The plan shall demonstrate that FPL will preserve, to the maximum extent possible, habitat that supports federal or state designated endangered or threatened species. Pursuant to Policy CON-9B of the Miami-Dade CDMP, all nesting, roosting and feeding habitats used by federal or State designated endangered or threatened species, shall be protected and buffered from surrounding development or activities, where necessary. Pursuant to Policy CON-9C of the Miami-Dade CDMP, rookeries and nesting sites used by federal or State designated endangered or threatened species shall not be moved or destroyed. The management plan shall include a comprehensive inventory of all threatened or endangered flora and fauna and identify all habitat that supports these species. The management plan shall address short-term measures to be taken during construction and permanent measures necessary to protect threatened or endangered species habitat. Permanent measures of this plan shall include, but not limited to, use of design features such as permanent physical barriers, visual buffers, and the establishment of development setbacks necessary to prevent both direct and indirect impacts to adjacent threatened or endangered species habitat. These design features, visual buffers, and setbacks shall be sufficient to prevent disruption of sensitive behaviors such as breeding, nesting and foraging within the adjacent habitat.
19. Prior to any construction related to the zoning requests in this application, FPL shall remove all prohibited plant species as defined pursuant to CDMP CON-8I and Miami-Dade Code Section 24-49.9 as may be amended from time to time, in accordance with applicable requirements of the Miami-Dade Code and CDMP. FPL shall maintain these areas to prevent growth or accumulation of all prohibited species, including all non-native grasses, weeds, and undergrowth consistent with the requirements of the CDMP, Section 24-49.9 and Section 19-14(A) Miami-Dade County Code for all work approved under this application. Furthermore, prohibited plant species shall not be sold, propagated, planted, imported or transported.

BE IT FURTHER RESOLVED that the requested modification of Condition #4 of Resolution Z-56-07 on Parcel A (Item #8), shall read as follows:

4. Except for Parcel "A", FPL shall not apply for a any water withdrawal from the Biscayne Aquifer as a primary source of cooling water for Nuclear Units 6 & 7. In Parcel "A", FPL shall not apply for any water withdrawals from the Biscayne Aquifer for a primary source of cooling water for Nuclear Units 6 & 7."

BE IT FURTHER RESOLVED that the requested modification of Condition #1 of Resolution 4-ZAB-559-71, last modified by Resolution Z-56-07 on Parcels A and B (Item #9), shall read as follows:

1. That in the approval of the plan, the same be substantially in accordance with that submitted for the hearing entitled 'FPL Turkey Point Public Hearing Application Detailed Operating Facility Plan', dated stamped received 7/26/07, and plans entitled 'FPL Turkey Point Public Hearing Application Construction/Operating Facility Plan' and 'FPL Turkey Point Public Hearing Application Subject Property,' consisting of 2 sheets dated stamped received 11/05/07, and plans entitled "New Proposed Unusual Use Boundary"; one sheet dated stamped received 1/29/13 and a second sheet dated stamped received 10/5/12 for a total of 2 sheets, all sheets prepared by Curtis Group."

BE IT FURTHER RESOLVED, notice is hereby given to the applicant that the request herein constitutes an initial development order and does not constitute a final development order and that one, or more, concurrency determinations may subsequently be required before development will be permitted.

The Director is hereby authorized to make the necessary notations upon the maps and records of the Miami-Dade County Department of Regulatory and Economic Resources and to issue all permits in accordance with the terms and conditions of this resolution.

THIS RESOLUTION HAS BEEN DULY PASSED AND ADOPTED this 10th day of January, 2012, and shall become effective ten (10) days after the date of its adoption unless vetoed by the Mayor, and if vetoed, shall become effective only upon an override by this Board.
