

PSEGESPCEm Resource

From: James Prescott [jprescott34@comcast.net]
Sent: Saturday, December 06, 2014 1:02 PM
To: PSEGESPEIS Resource; Alan Muller--Green Delaware; montgomery@delawareonline.com
Subject: Nuclear reactors

6 December 2014

Testimony has been given:

PSEG also is working with a company on designs for a new type of “small, modular reactor” with fewer parts, a simpler design, deep underground containment and waterless cooling features.

Although recycling water systems and cooling towers would be required for any new conventional reactors, a permit fight is expected in 2015 over renewal of the more-than 3 billion gallon per day cooling water intakes for Salem Units 1 and 2. Environmental groups have argued that any increase in cooling water withdrawals from the Delaware River will worsen already large aquatic life losses caused by existing demands.

Contact Jeff Montgomery at 463-3344 or jmontgomery@delawareonline.com.

It is transparent that the nuclear reactor proposal is a threat to ecology of public health and safety and that the PSEG also is working with a company on designs for a new type of “small, modular reactor” with fewer parts, a simpler design, deep underground containment and waterless cooling features; and *that this effort be accelerated with a postponement of the proposed nuclear reactor construction.*
