General Comment

Docket ID NRC-2009-0279, comment.

Dear Commissioners,

Thank you for reconsideration of the comment period regarding potential changes to the NRC's current radiation protection regulations. This is probably the most important document that the NRC has proposed that affects the health of every citizen and their families.

I know there are a lot of stakeholders and citizens that would very much appreciate the chance to read the proposed changes with the appropriate time frame to digest the information and research for an informed comment. This specific proposed rule was talked about on the WWW in depth and many missed the time frame wherein to comment.

I would also request that along with your normal channels to inform the public that it be expanded to include several well read newspapers across the U.S. perhaps. Not all citizens are aware of where to look for the opportunity to comment on important rules that affect them for the rest of their lives. In this age of computers you could whisper, on line, that commenting was open on specific topics and I believe the response would be overwhelming. Nuclear advocates are well aware of these notices but not the general public. You could ask the web-sites "Nuclear Cafe" or "Atomic Insights" or "ENEnews" and "BeyondNuclear" to post a link to your site.

Thank you for taking the time to read and hopefully act on my suggestions.

Sincerely,
Clyde C. Scalf
