Subject: VY Safety Evaluation Input

The following is a revised version of the FEMA input to conform with the safety evaluation style:

“FEMA Region 1 Radiological Emergency Preparedness (REP) staff observed VY post shut down EP drills on November 12, 2014 and December 3, 2014. Based on observations, FEMA Region 1 REP Program believes that the proposed staffing reductions at VY will not degrade the interface between the licensee’s staff and the offsite response organizations at the JIC and the EOF.”

Please review and approve.
