

Sea Turtle Stranding and Salvage Network (STSSN)

- [Report a stranded sea turtle to a STSSN state coordinator](#)

[Sea Turtle Strandings in the Gulf of Mexico](#)

The Sea Turtle Stranding and Salvage Network (STSSN) was formally established in 1980 to collect information on and document strandings of marine turtles along the U.S. Gulf of Mexico and Atlantic coasts. The network, which includes federal, state and private partners, encompasses the coastal areas of the eighteen-state region from Maine to Texas, and includes portions of the U.S. Caribbean.

Data are compiled through the efforts of network participants who document marine turtle strandings in their respective areas and contribute those data to the centralized STSSN database.

- [Online Stranding Reports](#)

Using online reports, you may obtain basic summarized stranding information from 1986-2007. For years 2008- current see the Weekly Reports below. When available all years will be combined into one system.

The data used to generate the reports have been verified from 1998-2006; however they are subject to change as additional data are received. The data from 1986-1997, and 2007 are preliminary and are in the process of being verified, beginning with 2007 then working through the earlier years.

Queries may include Year, Month, Region, Zone, State, County, and species.

Note: Check the box to accept the [Data Access and Release Policy](#) [pdf]

 - [Southeast U.S. Atlantic statistical zone map](#) [gif]
 - [Northeast U.S. Atlantic statistical zone map](#) [gif]

Weekly Reports

The 2007 - current Weekly Reports are in a new format which allow for more specific near real-time queries. These data are reported directly by the STSSN State and National Coordinators. These Weekly Reports are preliminary and subject to change, therefore they are not recommended for use in publications/analyses. It may take a few minutes to execute a large query. **2007 data posted October 2013.**

The Anatomy of Sea Turtles videos

To view these videos you will need QuickTime. You may [download QuickTime](#) . These files are very large and may take several minutes to download.

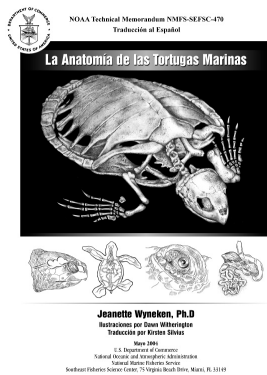

[The Anatomy of
Sea Turtles](#) [pdf]

Videos. This four part video series is supplemental to the manual:

1. [Introduction, Terminology and Species Identification](#) [mov]
(63.5 MB, 6 min)
2. [Dissection, Preparation, Standard Measurements, Dissection Tools, Anatomy, Opening the Body](#) [mov]
(65.7 MB, 5.5 min)
3. [Ventral Anatomy, Internal Anatomy and Landmarks, and GI Tract](#) [mov]
(103.2 MB, 9 min)
4. [Dorsal Anatomy, Sexual Dimorphism, Lungs and Airways, Exposing the Brain, Summary, and Credits](#) [mov]
(68.2 MB, 6 min)

La Anatomía de las Tortugas Marinas

Para ver lo siguientes videos usted necesitara bajar el programa de [QuickTime](#) . Estos archivos son pesados y le tomara algunos minutos bajarlos.

[La Anatomía de las Tortugas Marinas](#) [pdf]

Videos. Esta serie de cuatro videos es complementaria el manual.

1. [Introduccion, Terminologia, Identificacion de Especies](#) [mov]
(63.5 MB, 6 min)
2. [Preparacion para la Diseccion, Medidas Estandar, Equipo de Diseccion, Anatomia, Abriendo el Cuerpo](#) [mov]
(65.7 MB, 5.5 min)

3. [Anatomia Ventral, Anatomia Interna y Marcadores de Lugar, Via Gastrointestinal](#) [mov]
(103.2 MB, 9 min)
4. [Anatomia Dorsal, Dimorfismo Sexual, Pulmones y Vias Respiratorias, Abriendo el Cerebro, Resumen y Creditos](#) [mov]
(68.2 MB, 6 min)
