

**SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION**

1. LICENSEE/LOCATION INSPECTED:  Pennsylvania State University University Park, Pennsylvania 16802  REPORT NUMBER 2014-001		2. NRC/REGIONAL OFFICE  <b>U.S. Nuclear Regulatory Commission Region I, 2100 Renaissance Blvd, Suite 100 King of Prussia, Pennsylvania 19406-2713</b>	
3. DOCKET NUMBER 070-00113	4. LICENSE NUMBER SNM-95	5. DATE(S) OF INSPECTION October 10- November 13, 2014	

**LICENSEE:**

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

Non-cited violation(s) were discussed involving the following requirement(s) and corrective action(s):

- 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with the NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11. (Violations and Corrective Actions)

Condition 15 of NRC License No. SNM-95 requires that the licensee conduct routine radiation surveys monthly in areas where radioactive materials are used and/or stored.

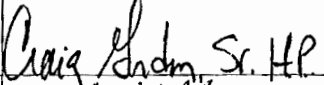

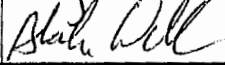

Contrary to the above, as of October 10, 2014, the licensee did not conduct routine radiation surveys monthly in areas where radioactive materials are used and/or stored. Specifically, the licensee had conducted routine radiation surveys on a quarterly frequency instead of the required monthly frequency.

This is a Severity Level IV violation (Enforcement Policy Section 6.3.d)

During the inspection exit meeting, the licensee's Radiation Safety Officer indicated that corrective actions had been taken by revising the procedure for routine surveys to the required monthly frequency, and implemented the revision into the program.

**Statement of Corrective Actions**

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.
