OFFICIAL USE ONLY – SENSITIVE PROPRIETARY (in email attachment)

Mr. Bice,

By letter dated May 6, 2014 (contains sensitive proprietary information, publicly available portions at Agencywide Documents Access and Management System (ADAMS) Accession Package No. ML14126A816), Entergy Operations, Inc. (Entergy, the licensee), submitted the Time-Limited Aging Analysis Regarding Reactor Vessel Internals Loss of Ductility for ANO, Unit 1, for NRC review. This report was submitted prior to entering the period of extended operation for ANO, Unit 1, as a result of the license renewal process.

During its review, the NRC staff has identified further information needed in order to complete its evaluation. Draft RAIs were transmitted to your staff on December 2, 2014, and I was notified via email that a clarification call was not needed. During a phone call with Ms. Pyle, it was agreed that an RAI response would be provided within 45 days, which is January 26, 2015.

**Upon separation from the attachment, this email is non-proprietary.**

Sincerely,

Andrea George  
Project Manager  
Nuclear Regulatory Commission  
Division of Operating Reactor Licensing
