Subject: Acceptance Review for MF5353 - Saint Lucie 2 -Request to Extend Reactor Vessel Surveillance Capsule Report Submittal

Importance: High

Ken,

In accordance with LIC-109, Acceptance Review Procedures, Revision 1, the Nuclear Regulatory Commission (NRC) staff has completed the acceptance review of the Request to Extend Reactor Vessel Surveillance Capsule Report Submittal for St. Lucie Unit 2 as provided in Florida Power & Light submittal dated December 3, 2014, and found it acceptable.

A determination has been made by the NRC staff that the relief request reasonably appears to contain sufficient technical information, both in scope and depth, for the NRC staff to complete the detailed technical review and render, in an appropriate time frame for the associated action, an independent assessment of the proposed action with regard to applicable regulatory requirements and the protection of public health, safety, and security.

If additional information is needed for the staff to complete its technical review, you will be advised by separate correspondence.

Thanks,
Farideh
