I would suggest changing these documents to notify OPA well in advance of Federal register notices about 1) seeking comment on a proposed agreement and the staff's draft assessment and 2) when the agreement has been approved but before it is published in the Federal Register.

Bottom line: we need to be brought into the process several weeks in advance of each of these steps so that a press release is ready to be issued the day before the first FRN seeking public comment and again before the FRN announcing the agreement has been completed.

Thanks.
