SUBJECT: SUMMARY OF CONFERENCE CALL MEETING TO DISCUSS OPEN  
ITEMS AND OUTSTANDING REQUESTS FOR ADDITIONAL  
INFORMATION RESPONSES RELATING TO DTE ELECTRIC  
COMPANY'S FERMI 3 COMBINED LICENSE APPLICATION

On Monday, October 30, 2014, the U.S. Nuclear Regulatory Commission's (NRC) staff held a public conference call from 1:00 pm to 2:00 pm with the staff of DTE Electric Company (DTE). The purpose of the conference call was to discuss the status of the remaining open items (OI) related to the Fermi 3 Combined License Application. A list of the agenda items, actions items discussed during the call, and a list of attendees are below. A revised agenda is available in Agencywide Documents Access and Management Systems Ascension No. ML15028A069.

**Agenda Items:**

**1. License Condition 03.09-03:**

DTE was concerned that the hold points should provide a wider range for when measurements should be taken. DTE was also concerned about the length of time instruments would be exposed to radiation based on the number of hold points specified in the license condition. The NRC assured DTE that during power uprates, the NRC would provide 24 hour coverage and would quickly acknowledge receipt of data sent to the NRC.

**2. License Condition (20.2-1):**

DTE asked the NRC staff to clarify the statement in item f concerning maintaining the guidance and strategies described in the application.

**3. License Condition (20.4-1):**

DTE did not have any comments on the license condition.

**Meeting Action Items:**

NRC Action Items:

1. The NRC staff will reconsider the hold points for License Condition 03.09-03.
2. The NRC agreed to clarify the statement in License Condition 20.2-1, item f.

The list of participants for the meeting is included as enclosure.
