**Subject:** Request for Extension for the Westinghouse Fuel Handling Equipment and Crane Manufacturing Reply for Notice of Violation and Notice of Nonconformance Items

Westinghouse acknowledges receipt of NRC Inspection Report Number 99901452/2014-201, Notice of Violation and Notice of Nonconformance Items dated December 4, 2014. Westinghouse takes any notice of violation or nonconformance received from the NRC seriously and is taking appropriate actions to completely resolve these issues in a timely manner, and is committed to be in compliance with the provisions of Criterion III, "Design Control" of Appendix B, "Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocess Plants," to Title 10 of the *Code of Federal Regulations* (10 CFR) Part 50, "Domestic Licensing of Production and Utilization Facilities" and 10 CFR Part 21, "Reporting of Defects and Noncompliance."

Westinghouse also values the results from this thorough review of our Fuel Handling Equipment and Crane Manufacturing activities. In consideration of NRC comments made both during the inspection and in the exit meeting, Westinghouse immediately initiated many corrective actions to resolve the specific items identified in the Notice of Violation and Notice of Non-Conformances.

In order to complete the above activities and ensure a comprehensive evaluation of the Notice of Violation and Notice of Nonconformance, Westinghouse respectfully requests that the NRC grant an extension to the reply date. With the upcoming holidays this will enable us to confirm that the reply adequately addresses the identified issues and accurately describes the actions that are being taken and have been taken. Therefore, Westinghouse requests that the reply due date be extended thirteen days to January 16, 2015. Thank you for the NRC's consideration in this matter. If you have any question concerning this request please contact Ron Wessel at 412-374-4023 or [wesselrp@westinghouse.com](mailto:wesselrp@westinghouse.com).
