

GEOLABS, INC.

Geotechnical Engineering and Drilling Services

December 17, 2014

U.S. Nuclear Regulatory Commission,
Attn: Document Control Desk,
Washington, DC 0555-0001

Subject: Reply to a Notice of Violation for NRC Inspection Report 030-20393/2014-001 and Notice
of Violation

License No.: 53-23231-01

To Whom It May Concern:

This letter is written in response to the notice of violation as per the above subject.

- 1) The reason this violation occurred was because I did not have enough locks on hand to secure all the gauges and storage boxes in the storage room.
- 2) The corrective action we have taken: We have now purchased the right amount of locks for all the gauges in the storage room and for their gauge box. All technicians have been instructed to secure the portable nuclear gauge with a lock on the handle and lock the outer container while it is stored in the storage room.
- 3) To avoid future violations: We will keep extra locks in inventory in case of a loss and ensure technicians continue to lock gauge handle and storage box while stored in the storage room.
- 4) Full compliance was achieved on September 25, 2014

The attached are photos of the purchased locks and invoice.

Should you need additional information, please contact me at steve_a@geolabs.net.

Regards,

Steven Asato,
Radiation Safety Officer
