Re: Reply to a Notice of Violation: NRC Inspection Report No. 03036264/2014001

Dear Sir or Madam,

Virgin Islands Paving Inc. understands the gravity of the Severity Level IV violation and in response to the Notice of Violation sent November 21, 2014 VI Paving has prepared the following response:

Mr. Bryan Farley was VI Paving's RSO during the above referenced NRC's inspection. At the time Mr. Farley was also VI Paving's Quality Control Officer. We have since split the two responsibilities and have assigned a new RSO. This will allow greater focus to be put towards the RSO responsibilities. Mr. Daniel Schierloh has been assigned the new RSO. Mr. Schierloh will be in charge of all RSO duties including the keeping of inventory for all nuclear gauges.

To prevent any future violation we have implement a new policy were the Quality Control Officer (QC) will be responsible for filing all NRC and nuclear gauge documents, while the RSO will be responsible for actually conducting tests or writing reports. This will create a system that has the RSO and the QC double checking each other and creating less of a chance of further violations.

Currently, as of November 1st 2014, all nuclear gauge inventory has been updated.

Sincerely,

Robert Schierloh
President
