SUBJECT: Correction to Typographical Error in Entergy Letter GNRO-2014/00053, Application To Revise Technical Specifications To Adopt TSTF-523, "Generic Letter 2008-01, Managing Gas Accumulation," Using The Consolidated Line Item Improvement Process
Grand Gulf Nuclear Station, Unit 1
Docket No. 50-416
License No. NPF-29

REFERENCE: 1. Letter: GNRO-2014/00053, Application To Revise Technical Specifications To Adopt TSTF-523, "Generic Letter 2008-01, Managing Gas Accumulation," Using The Consolidated Line Item Improvement Process (ML1428A092)

Dear Sir or Madam:

Entergy Operations Inc. (Entergy) in the above reference letter submitted a request to amend the technical specifications for the Grand Gulf Nuclear Station to support the adoption of TSTF-523, Generic Letter 2008-01, Managing Gas Accumulation.

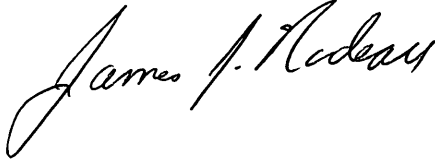

During the development of this letter a typographical error was introduced. The error was identifying the applicable revision of TSTF-523 as Revision 1 versus Revision 2. The letter should have identified the applicable revision as Revision 2. No other errors have been identified and the identified error does not change the safety evaluation documented in the request.

Entergy requests the Nuclear Regulatory Commission to continue with the review and approval process based on the understanding that Entergy is requesting to adopt Revision 2 of TSTF-523.

This letter contains no new commitments. If you have any questions or require additional information, please contact James Nadeau at 601-437-2103.

Sincerely,

JJN/ram
