The proposed revisions to the CSP Implementation Milestone descriptions will bring WBN Unit 2 Implementation Milestone descriptions into alignment with Nuclear Energy Institute (NEI) template Implementation Milestone descriptions (Reference 1), the Implementation Milestone descriptions contained in an NRC request for additional information (RAI) (Reference 2), and WBN Unit 1 Implementation Milestone descriptions (Reference 3).

The current WBN Unit 2 proposed LCs reference two systems within the Cyber Security Plan and were previously approved for WBN Unit 2 as documented in NUREG-0847, "Safety Evaluation Report - Related to the Operation of Watts Bar Nuclear Plant, Unit 2," Supplement 24 (Reference 4). This submittal proposes changes in the CSP requirements for Implementation Milestones 6, 7, and 8 to align with the Nuclear Energy Institute (NEI) Template and WBN Unit 1.

Enclosure 1 to this submittal contains the description and completion date changes for the WBN Unit 2 CSP Implementation Schedule Milestone descriptions 6 and 7, the deletion of the CSP License Conditions, and the basis for these changes. Enclosure 2 to this submittal contains the description and basis for the proposed extension request to CSP Implementation Milestone 8. Enclosure 3 to this submittal contains the proposed CSP LC for WBN Unit 2.

TVA requests approval of this change by March 31, 2015.

TVA considers Enclosures 1 and 2 to contain security related information and requests that they be withheld from public disclosure pursuant to 10 CFR 2.390(d)(1).

There are no new regulatory commitments associated with this submittal. Please address any questions regarding this request to Mr. Gordon Arent at (423) 365-2004.

I declare under penalty of perjury that the foregoing is true and correct. Executed on this 9<sup>th</sup> day of January 2015.

Respectfu

Shea President, Nuclear Licensing
