Re: Strata Energy, Inc., Ross In Situ Recovery Project
Source Materials License SUA-1601, Docket No. 040-09091
Submission of Annual Letter Report Required Under Programmatic Agreement

Dear Director:

Attached please find the subject report required under Stipulation H of the Programmatic Agreement for the Ross Uranium Project. Upon NRC acceptance, Strata will provide this annual report to the Signatories and the Ross Project Consulting Tribes.

Please contact me if you have any questions regarding the attached report. You can reach me at (307) 686-4066 or mgriffin@stratawyo.com.

Sincerely,

Strata Energy, Inc.

Strata Energy, Incorporated
December 17, 2014

The Programmatic Agreement (PA) for Nuclear Regulatory Commission (NRC) compliance with Section 106 of the *National Historic Preservation Act*¹ was completed in May of 2014. Stipulation H. of the PA requires submission of an annual report on implementation of the PA by Strata to the NRC. The following is the report to the setting out steps towards implementation of the PA in 2014.

Stipulation B. of the PA calls for completion of the recording of certain unevaluated cultural properties and archaeological testing of other properties located within the Phase 1 area of the project. Strata is required to submit a testing plan to accomplish the work needed. GCM Services, under contract with Strata Energy, is currently completing work on the required plan. Part of that work included on-site visits for general planning and non-invasive professional observations of soil conditions to help support testing recommendations. The report on those soils studies will be included as an appendix to the plan. Also, the plan will address that part of Stipulation B. which requires that as part of the review of the testing plan, the NRC will consult with Strata concerning whether potential adverse effects to any of these cultural properties or portions thereof may be avoided. The report will include a map and other information as necessary to accomplish that. At present, Strata projects submission of the testing plan and avoidance analysis to the NRC in early January, 2015. Stipulations in the PA for review of that plan provide for a review period of 90 days. Thus, Strata currently projects that testing would be conducted on-site in the field season of 2015.

In letters dated March 6, March 27 and April 8, 2014, the NRC provided the Wyoming SHPO (WYSHPO) with the tribal surveys on the identification and evaluation of Traditional Cultural Properties. In a letter dated May 5, 2014, the WYSHPO identified various deficiencies in the documentation from the NRC. The NRC then organized additional work necessary to address the concerns expressed by the WYSHPO. The NRC supplied supplemental information under a cover letter to the WYSHPO dated December 4, 2014. Eleven properties have been evaluated by the NRC as eligible for the NRHP as TCPs. At the time of this writing, the WYSHPO has not responded to the NRC.
