

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

January 15, 2015

MEMORANDUM TO: Brian Thomas, Director
Division of Engineering
Office of Nuclear Regulatory Research

FROM: Stanley Gardocki, Acting Chief **/RA/**
Regulatory Guidance and Generic Issues Branch
Division of Engineering
Office of Nuclear Regulatory Research

SUBJECT: RESULTS OF PERIODIC REVIEW OF REGULATORY GUIDE
(RG) 1.167

This memorandum documents the U.S. Nuclear Regulatory Commission's (NRC) periodic review of regulatory guide (RG) 1.167, "Restart of a Nuclear Power Plant Shut Down by a Seismic Event." The RG provides guidance on performing inspections and test of nuclear power plant equipment and structures prior to restart of a plant that has been shut down by a seismic event. It was published in March 1997. As discussed in Management Directive 6.6 "Regulatory Guides", the NRC staff reviews regulatory guides approximately every 5 years to ensure that the RGs continue to provide useful guidance. Documentation of the NRC's review is enclosed.

Based on the results of the periodic review, the staff concludes that a revision to RG 1.167 is warranted. A draft guide is expected to be transmitted to the Regulatory Guidance and Generic Issues Branch in October 2015.

Enclosure:
As stated
