Subject: McCallum Testing LLC, Request for Additional Information Concerning Application for a License Amendment, Control 585569
Date: Tuesday, January 06, 2015 2:20:00 PM

Dear Ms. Ebbert,

This is in reference to your letter dated December 16, 2014, requesting for amendment to Nuclear Regulatory Commission License No. 45-15325-01, Docket No. 030-08916. In order to continue our review, we need the following additional information:

1. The description in section 5.1 of your letter is not a clear description of the transaction in the ownership of the company. NUREG-1556, Volume 15, "Consolidated Guidance About Materials Licenses Guidance About Changes of Control and About Bankruptcy Involving Byproduct, Source, or Special Nuclear Materials Licenses," states to provide a description of transaction. Please provide if you are the 100% owner or how ownership is structured. Please state if this transaction was a purchase of McCallum Testing Laboratories, Inc., a portion of the company, or other transaction.
2. Please confirm that the new licensee is McCallum Testing LLC, dba McCallum Testing Laboratories, Inc. and the license should be amended to reflect that name.
3. Section 5.5 of your letter stated that you are licensed for use of Troxler Electronic Laboratories Model No. 4340. This appears to be a typographical error. Please confirm that you are licensed for Troxler Electronic Laboratories Model No. 4640.

We will continue our review upon receipt of this information. Please reply to my attention at the Region 1 Office (Address below) and refer to Mail Control No. 585569. If you have technical questions regarding this letter, please call me at (610) 337-5366.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Please note that you may not reply to this letter by return e-mail. Your reply must be in writing by letter or facsimile (610-337-5269). If we do not receive a reply from you within 30 calendar days from the date of this e-mail, we will assume that you do not wish to pursue your application.

Region 1 Office Mailing Address: Licensing Assistance Team, US Nuclear Regulatory Commission Region I, 2100 Renaissance Boulevard, Suite 100, King of Prussia, PA 19406-2713.
