SUBJECT: SUSQUEHANNA STEAM ELECTRIC STATION, UNITS 1 AND 2 – DRAFT REQUEST FOR ADDITIONAL INFORMATION RE: LICENSE AMENDMENT REQUEST TO REVISE TS 3.4.10, “RCS PRESSURE AND TEMPERATURE LIMITS” (TAC NOS. MF4597 AND MF4598)

Dear Mr. Filchner:

By letter dated August 11, 2014, (Agencywide Document Access and Management System (ADAMS) Accession No. ML14223A780) PPL Susquehanna, LLC (PPL), submitted a license amendment request for review and approval for the Susquehanna Steam Electric Station (SSES) Units 1 and 2. Specifically, PPL requested to revise SSES Technical Specification 3.4.10, “RCS Pressure and Temperature Limits”.

The NRC staff has reviewed the information submitted by the licensee, and based on this review, determined additional information is required to complete the assessment of the license amendment. Please find attached a DRAFT copy of the NRC staff’s additional information request. These DRAFT RAIs are being sent to you to ensure that the questions are understandable, the regulatory basis for the questions are clear, and to determine if the information was previously docketed. Please notify me by Friday, January 23, 2015, if you desire to hold a teleconference to discuss the questions. The NRC staff will request a response to the RAIs within 30 days of the formal NRC RAI transmittal letter.

Thank you,

Jeffrey Whited
