

This page provides an abstract, justification, and target dates for a potential rule that the U.S. Nuclear Regulatory Commission (NRC) has prioritized in its Common Prioritization of Rulemaking listing.

Please visit the [Rulemaking Priorities](#) page on the NRC's public Web site for additional information about this page and to view the entire Common Prioritization of Rulemaking listing.

<b>Amendments to Material Control and Accounting Regulations</b>				
<b>Abstract</b>				
The rule would amend the Commission's material control and accounting (MC&A) regulations. These regulations apply to the NRC licensees who are authorized to hold special nuclear material (SNM) and to certain licensees within the jurisdiction of the Agreement States that hold SNM and submit material status reports to the NRC. The amendments would revise and consolidate the MC&A requirements.				
<b>Justification</b>				
The rule scores 18 points (5, 7, 5, 1) because of the following reasons:				
A. Moderate contributor toward one goal and implements one goal strategy (security strategies 4)				
B. Moderate contributor toward one strategy (regulatory effectiveness strategies 2)				
C. Significant contributor toward one or more considerations or the Commission has provided specific direction with and priority/schedule on the rulemaking. SRM on SECY-08-0059 dated 2/5/09 provides Commission direction to proceed with the rule. Commission approved publication of the proposed rule.				
D. Less substantial or indirect contributor toward one or more considerations. Little stakeholder interest has been expressed in the rule.
