

This page provides an abstract, justification, and target dates for a potential rule that the U.S. Nuclear Regulatory Commission (NRC) has prioritized in its Common Prioritization of Rulemaking listing.

Please visit the [Rulemaking Priorities](#) page on the NRC's public Web site for additional information about this page and to view the entire Common Prioritization of Rulemaking listing.

<b>2015 Edition of the American Society of Mechanical Engineers Boiler &amp; Pressure Vessel Code</b>				
<b>Abstract</b>				
<p>The purpose of this rulemaking is to amend the NRC's regulations to incorporate by reference the 2015 American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel code. This is a non-discretionary rule directed by SECY-10-0016. The NRC has a well-established practice of approving and/or mandating the use of certain parts of editions and addenda of ASME Codes in 10 CFR 50.55a through the rulemaking process of incorporation by reference. This practice assures consistency across the industry and that the NRC will continue to support the use of the most updated and technically sound techniques developed by the ASME to provide adequate protection to the public. This rulemaking also enhances the efficiency and effectiveness of NRC regulations by making use of current voluntary consensus standards and is consistent with applicable requirements of the National Technology Transfer and Advancement Act.</p>				
<b>Justification</b>				
<p>The rule scores 33 points (10, 10, 10, 3) because of the following reasons:</p> <p>A. Moderate contributor to the Safety Goal (Strategy 1).  B. Significant contributor to the Regulatory Effectiveness (Strategies 1 &amp; 2).  C. Commission direction in SECY-10-0016 and implements applicable requirements of the National Technology Transfer and Advancement Act.  D. Moderate stakeholder interest.</p>
