Norma,

Thanks for giving me a call and an update on your discussions with the reviewers. As we discussed on the phone, four of the NRU/NRX baskets are back at CHT. To the maximum extent possible, CHT will be re-performing VTs on the affected welds. As part of this effort, CHT will be providing a detailed report to NAC on the results. I will let you know when we expect to get the report after I have a chance to talk to our transport group and QA. Also, let me know what date/time next week works for us all to have another conference call on this topic.

Thanks.

Norma,

When you get a chance can you give me a call at my office number below. I wanted to get some feedback on what you and the technical reviewers discussed with regards to our previous submittal on the nonconformance (e.g. whether the submittal was sufficient to close out the issue or if there is additional stuff we may be able to provide that would).

Thanks.

Good morning Wren,

Thanks for letting me know about the PT and my phone. (I have asked to fix it twice and the technician did not find any issues at the time. It may be time to replace it.)

I am working from home today and you can contact me through the NRC's operator at 301-415-7000 by telling the operator that you want to talk to me and that I am working from home.

Have a nice weekend,  
Norma

Hi Norma,

I wanted to let you know we looked into the PTs that were done on the affected welds on the NRU/NRX baskets. Unfortunately, the same individual who performed the VT also did the PT. Also, you might want to check your voicemail settings. I tried to leave you one but the message said you aren't accepting voicemail at this time.

Thanks.
