Ms. Toye L. Simmons
Materials Licensing Branch
Region III
Nuclear Regulatory Commission

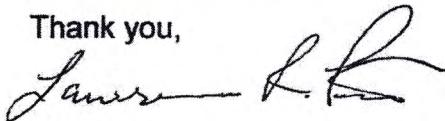

Dear Ms. Simmons,

This memo and associated attachments provides decommissioning and closure evidence required by the Nuclear Regulatory Commission in order to terminate NRC Material License No. 13-32765-01 to cease radioactive material operations at the facility located at 9715 Kincaid, Fishers, Indiana.

With the conclusion of Positron Corporation's radiopharmaceutical development activities at this location in December 2014, the company has made the decision to decommission the Fishers, IN site. During the past 12 months, Positron finalized product development making the decommissioning of this licensed site practical for the Company as no further activities will be conducted under NRC Material License No. 13-32765-01.

As part of its decommissioning plan, Positron Corporation employed ADCO Services, Inc. of Tinley Park, IL to dispose of four (4) accountable radioactive sources and any remaining radioactive waste. The service included removal, packaging, and transportation in compliance with the requirements of 10CFR20, appendix G, section III, C.1. A description of the final radiation survey is provided in the attached documentation.

Thank you,

Lawrence R. Pitt
Radiation Safety Officer
