

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

REGION III  
2443 WARRENVILLE RD. SUITE 210  
LISLE, IL 60532-4352

JAN 23 2015

Mel M. Mickelson  
Radiation Safety Officer  
SG Solutions, LLC  
444 W. Sanford Avenue  
West Terre Haute, IN 47885

Dear Mr. Mickelson:

Enclosed is Amendment No. 7 renewing your NRC Material License No. 13-26571-01 in accordance with your request, including to add Condition Nos. 18 and 19, to revise Condition Nos. 12 and 13, and to renumber some items. Also, as I discussed with your colleague Mark Boyd, via e-mail on January 20 & 21, 2015, we have limited individuals authorized to perform non-routine maintenance, as listed in Item 17.A., to you, Mel M. Mickelson.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The regulations specified in Title 10 of the *Code of Federal Regulations* Part 37 (Part 37) "Physical Protection of Byproduct Material," impose physical security requirements for the possession and use of the most risk significant radioactive materials. The most risk significant radioactive materials are referred to as Category 1 and Category 2, based on quantities, and are listed in Appendix A of 10 CFR Part 37. The list is based on the International Atomic Energy Agency's rankings of radiation sources. NRC licensees were required to fully implement the new regulation by March 19, 2014. The requirements of Part 37 supersede the requirements of the "Order Imposing Increased Controls" and the "Order Imposing Fingerprinting and Criminal History Records Check Requirements for Unescorted Access to Certain Radioactive Materials."

**Please note that, in addition to revising the Items noted above, we have amended your license to remove License Condition No. 23, as listed on the previous revision to your license, which required implementation of the Orders listed above. Accordingly, you are now required to comply with the security requirements of Part 37.**

The enclosed document contains sensitive security-related information.  
When separated from this cover letter this letter is uncontrolled.

M. Mickelson

- 2 -

New license applicants and licensees newly subject to 10 CFR Part 37 must implement the requirements before taking possession of an aggregated Category 1 or Category 2 quantity of radioactive material. The NRC would consider the licensee to have taken possession of an "aggregated" Category 1 or Category 2 quantity of radioactive material when and if it places an accumulated quantity at or above the Category 2 threshold behind a single physical barrier. A licensee that has not previously implemented the security orders or had not been subject to the provisions of Part 37 must notify the U.S. Nuclear Regulatory Commission, Region III, Materials Licensing Branch, 2443 Warrenville Road, Suite 210, Lisle, IL 60532-4352 in writing at least 90 days before aggregating radioactive material to a quantity that equals or exceeds the Category 2 threshold.

The new rule is available on NRC's public website at <http://www.nrc.gov/reading-rm/doccollections/cfr/part037/>. Also, NRC has created a website for 10 CFR Part 37 that can be found at <http://www.nrc.gov/security/byproduct/10-cfr-part-37.html>. This site contains helpful information, such as hyperlinks to the final rule language as published in the Federal Register (<http://www.gpo.gov/fdsys/pkg/FR-2013-03-19/pdf/2013-05895.pdf>), types of licensees that may be subject to 10 CFR Part 37 requirements, the implementation guidance for the rule (NUREG-2155) (<http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr2155/>), as well as some frequently asked questions that have been developed during the implementation process. This website is updated as needed, and it is recommended that licensees review this information periodically. In addition, the NRC issued a Regulatory Issue Summary 2014-03 Notice of 10 CFR Part 37 Implementation Deadline for NRC Licensees on March 13, 2014 (ADAMS ML14052A157).

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.
