Re: Approval of Non-Significant Revision Application, Cameco Resources Mine, Permit No. 633, TFN 6 4/128, Injection of Bicarbonate at End of Mining Treatment, Change No. 73.

Dear Mr. Garoutte:

This letter approves your Non-significant Permit Revision to inject Bicarbonate into Mine Unit-E as an end of mining treatment process. This treatment will be conducted prior to groundwater restoration and clean water injection. In the event that revisions other than those listed on the Index of Changes inadvertently occurred within this package, those revisions are not automatically considered approved.

The LQD tracks this NSR as Change No. 73.

Please feel free to contact me if questions or concerns arise.

Respectfully,

Miles Bennett
Uranium Coordinator
