Frank P.D. Tran
Health Physicist
Nuclear Regulatory Commission, Region III
2443 Warrenville Road, Suite 210
Lisle, IL 60532-4352

Dear Mr. Tran,

I am writing in response to your request for information regarding the renewal application of Complete Health Systems, License No. 21-32543-01, Docket No. 030-36714. I will answer your questions below:

1. Mr. Craig VanHouten was approved by the management to sign the renewal application on their behalf.
2. The mobile service takes the radioactive material and imaging camera into the doctor's offices. After the studies are completed and all radioactive materials are removed from the office, the doctor's office is surveyed with a GM meter and wipes performed.
3. No PET radiopharmaceuticals are used by this company.
4. The imaging room at the address 5084 Villa Linde Plwy is marked Exam #2. This is the same room in which patients are injected with radiopharmaceuticals for the rest studies.
5. Radioactive materials are delivered to the stationary site at 5084 Villa Linde or to the trailer when a technologist is present.
6. The licensee provides personnel dosimetry devices to those meeting "criteria" in NUREG-1556, Volume 9, Rev. 2.
7. The licensee has developed and implemented and maintained written procedures for area surveys in accordance with 10CFR20.1101 that meet the requirements of 10CFR20.1501 and 10CFR35.70.

If you have any further questions regarding this application, feel free to contact our consulting physicist, Vince McCormick at (734)395-9323.

Sincerely,

Anthony Bennett, M.D.

Radiation Safety Officer, Complete Health Systems

Overview

Giving you more in nuclear cardiac imaging

Who says you can't have it all? At a time when medical services and practices are looking for ways to improve workflow and quality, Digirad's Cardius® 2 XPO dedicated cardiac SPECT imaging system distinguishes itself from all other dual-head cameras with a compact, patient-friendly, open design featuring exclusive solid-state detectors and advanced cardiac software. The Cardius 2 XPO can easily be installed in rooms as small as 7 X 8 ft. and does not require anchoring to the floor, making it easy to relocate, if desired.
