Subject: NRC/FPL clarification call follow-up for response to Fill Materials properties

Manny

Here is a listing of the FSAR references we discussed on the clarification call last week and the previous call in December.

1. Possible borrow site locations for the backfill are given on page 2.5.4-65
2. At the end of the page 2.5.4-65, the following commitment is included. "Once the final backfill source(s) for structural fill is determined, additional material testing is required to verify the design properties."
3. The compaction requirements for the backfill are given on Page 2.5.4-69.
4. Design properties considered for the backfill (for all the fill to be used on site) are given in Table 2.5.4-209.

Please let us now if any further clarifications is required.

Thanks

Steve Franzone
