

February 24, 2015

Katie Sweeney
General Counsel
National Mining Association
101 Constitution Avenue, NW
Suite 500 East
Washington, DC 20001

Dear Ms. Sweeney:

I have received your letter dated January 23, 2015, outlining the concerns of the National Mining Association (NMA) regarding the U.S. Nuclear Regulatory Commission (NRC) staff's positions related to health physics reviews of licensing actions involving the uranium recovery industry. In particular, you expressed concern over NRC staff's approach to effluent monitoring and public dose calculations specific to radon-222 and its decay products. I will provide a detailed response to your concerns prior to the NMA Uranium Recovery workshop scheduled in June 2015.

In the meantime, my staff is reviewing several licensee submittals related to demonstrating compliance with public dose limits, including exposures related to radon-222 and its decay products. In addition, my staff is finalizing industry guidance in the form of interim staff guidance (ISG), FSME-ISG-01: Evaluations of Uranium Recovery Facility Surveys of Radon and Radon Progeny in Air and Demonstrations of Compliance with 10 CFR 20.1301, in order to issue this guidance in March 2015.

In accordance with 10 CFR 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

If you have any questions concerning the above, please contact David Brown of my staff at (301) 287-9110 or via email at David.Brown@nrc.gov.

Sincerely,

/RA/

Larry W. Camper, Director
Division of Decommissioning, Uranium Recovery
and Waste Programs
Office of Nuclear Material Safety
and Safeguards
