Thanks, Randy. If you could clarify that as part of your response, it would be helpful.

Mike,

Thanks for the reference. I read this statement to indicate that the the 150 birds noted in the wildlife management plan to have been observed

onsite were likely taken from the 73-74 NUS study.

Subject: Fermi 3 COLA ER Statement

Lynne and Randy,

Below is the statement from the COLA ER (Rev.2, page 2-328) I was referring to:

Although the 2000 Wildlife Management Plan provided a list of 287 species potentially occurring in the Fermi vicinity, only 150 were noted as observed on the Fermi property, the same 150 noted in the 1973-74 NUS study.

Thanks,

Mike
