## **NRC Assigns New Senior Resident Inspector to Limerick Nuclear Plant**

Nuclear Regulatory Commission officials in King of Prussia, Pa., have selected Scott Rutenkroger as the new Senior Resident Inspector at the Limerick nuclear power plant. The two-unit site is operated by Exelon Nuclear and is located in Limerick, Pa.

“Scott Rutenkroger has the experience, training and commitment to safety that is needed for the NRC to carry out its mission of protecting people and the environment by ensuring the safe operation of the Limerick units,” said NRC Region I Administrator Dan Dorman.

Most recently, Rutenkroger was the Senior Resident Inspector at Vermont Yankee, and was also was a Resident Inspector at the James A. FitzPatrick nuclear plant in Scriba, N.Y. Rutenkroger joined the NRC’s Region IV office in Arlington, Texas, in June 2004 as a reactor inspector. He is a graduate of the NRC’s Nuclear Safety Professional Development Program, a two-year training program that provides a broad and a specialized perspective of NRC activities. He also completed a rigorous NRC inspector qualification program. He earned a doctorate in electrical engineering, as well as master’s and bachelor’s degrees in nuclear engineering, from the University of Missouri-Rolla.

Each of the nation’s commercial nuclear plants has at least two Resident Inspectors who serve as the agency’s eyes and ears at the facility, conducting regular inspections, monitoring significant work projects and interacting with plant workers and the public.

Rutenkroger joins Resident Inspector Richard Montgomery at Limerick. The Limerick Resident Inspectors can be reached at 610-327-1344.
