

Note to File dated February 9, 2015

License No.: 52-35189-01

Docket No.: 030-38787

Mail Control No.: 585267

SUBJECT: Basis for authorizing Ivan Velez-Miro, M.D. for use of radiopharmaceuticals permitted by 10 CFR 35.100, 35.200, and 35.300 pursuant to 35.57 (training for the experienced authorized user).

In the request for a new license dated November 5, 2014, Hospital Metropolitano, Dr. Susoni requested that Ivan Velez-Miro, M.D. be added as an authorized user and listed U.S. NRC license no. 52-16033-01 as evidence of previous authorization. He is not authorized on this license; however, after conducting a search in ADAMS I found that he authorized on Hospital Melendez (52-23044-01) and Advanced Technonuclear Imaging Center (52-25340-01). Since he is authorized for the materials requested on both of these licenses he meets the requirements requested on this application.
