Mr. Kim:

I don't see anything in your attached letter that is marked confidential or proprietary, but I would like to learn whether you agree before I determine whether it will be made publicly available. Just as a reminder, it is not sufficient to submit an affidavit; the pages that are confidential or proprietary must be properly marked, and a non-proprietary copy (with proprietary information whited out) must be provided.

Thank you,

Richard K. Struckmeyer

Subject: RE: Exempt-Distribution license application

Dear Mr. Struckmeyer,

First of all, I apologize for the delay of response and I thank you for the email regarding the NRC's internal 90 day deadline policy. And, of course, we have not abandon the project. In fact, we have some positive result from CDPH. So, we will continue do our best to provide all the information you need including CDPH license to process in time. We are currently in contact with the CDPH closely and Ms. Beverly Hill who handles our application in the CDPH is fully aware of our situation with NRC application and deadline policy. I am sure she will assist us as much as she can.

Today, I am mailing out(FedEx Overnight) our answers to the rest of RAI #6,7, & 8 that I missed in my previous reply dated 1/5/2015. I also enclosed the remainder of Kr-85 lamp vessel MicroShield calculations for the series 40-0125 that I did not provide last time and it will complete the entire series MicroShield calculation summary for the moment. I believe there will be more models and series developed and assigned down the road but they all will be pretty much in line with these calculations. Attached, you will find a same copy of today's mail in PDF version.

Should you have any question, please feel free to contact me.

Sincerely,

Inyu Kim

Subject: Exempt-Distribution license application
Importance: High

Mr. Kim:

Please provide a date by which you intend to provide the remaining information in response to our Request for Additional Information (RAI) dated December 11, 2014.

As stated in that RAI:

“We will continue our review upon receipt of this information. If we do not receive your reply within 30 calendar days from the date of this letter, we will consider your application as having been abandoned by you. This action would be without prejudice to the resubmission of another application with the required information. Note: Your letter stated that you have submitted a Radioactive Material License Application to the California Department of Public Health, Radiologic Health Branch, and it is being processed for licensing. Although we will continue our review, an exempt-distribution license will not be issued unless and until you have received the license from the State of California.”

Although it is apparent that you have not abandoned your application, and do not intend to do so, it may be necessary to void your license application, depending upon how soon the requested information is provided. We have an internal deadline of 90 days for the processing of an application for a new license. That deadline is February 18, 2015. If you do not foresee getting a license from the State of California by that date, or if you cannot provide the additional requested information by February 4, 2015, it will be necessary to void your application and ask you to reapply when all of the information, including your California license, become available.

Thank you,

Richard K. Struckmeyer
