Mr. Finley,

Attached is FINAL RAI No. 429 (eRAI No. 7805) pertaining to pertaining to Calvert Cliffs Unit 3 FSAR Chapter 13, Section 13.3. This RAI includes questions on the revised Evacuation Time Estimate Report submitted by UniStar. The draft of this RAI was previously sent to UniStar on January 22, 2015. In the February 11, 2015 Phone call with Surinder Arora, you confirmed that no clarification phone call was required to discuss the draft question and the subject RAI could be issued as "final". This email, therefore, transmits the final RAI for your response with no changes to the draft question.

The schedule that we have established for review of your COL application assumes that your technically complete response to the RAI questions or a schedule for providing a complete response must be received within 30 days of the final issuance of the RAI. Please note that if, in lieu of a complete response, you are providing a response schedule, the staff will re-evaluate the completion schedule for the applicable chapter based on the response date provided by you.

Please also note that the time duration listed above is our normal time duration. However, due to the fact that Chapter 13, specifically the ETE Report, is one of the items that UniStar wants the staff to finish, it is highly recommended that you take expeditious action and respond to the RAI question as soon as practical so that the staff's reviews continue without interruptions. Any interruptions, as you will appreciate, could have detrimental impact on our review schedule established for this chapter.

Additionally, please make sure to include in your response letter a statement certifying whether or not your response contains any sensitive or proprietary information that needs to be withheld from the public disclosure.

Thanks.

QUESTIONS

13.03-83

RAI ETE-14. In response to RAI 156, Question 13.03-26(G) dated December 18, 2009, the applicant committed to including Dominion Cove LNG (Dominion) as an employer in the vicinity of the CCNPP Unit 3 site. The staff notes that Dominion was not identified as an employer in the vicinity of the CCNPP Unit 3 site in Revision 4 of the ETE and that the LNG facility is currently under construction. The staff requests for the applicant to clarify if the employees and corresponding vehicles that will support operation of this facility were considered in the ETE analysis for the CCNPP Unit 3 site. In addition, please explain any impact to the ETE if vehicles from the Dominion facility were not included.
