**Re: Supplement to Lost Creek's December 12, 2014 Reply to Notice of Violations
Lost Creek ISR Project License SUA-1598, Docket 040-09068**

To Whom It May Concern:

On December 12, 2014, Lost Creek ISR, LLC (LCI) provided a response letter to NRC's November 14, 2014 findings of inspections and notice of violations. After discussions with NRC staff regarding the proposed corrective actions presented in the December 12, 2014 letter, LCI hereby wishes to provide the following additional response to Violation #2 pertaining to "Failure to Evaluate the Use of Water Storage Tanks."

LCI proposes that the Lost Creek Management of Change SOP will be revised to include the following language: "When reviewing a proposed action, including but not limited to a SERP review, the NRC Project Manager will be consulted if it is unclear if a license amendment or other NRC approval is required prior to completing the action under review."

The revision to the Management of Change SOP will be made, and all site and other affected personnel will be made aware of this requirement, by February 28, 2015.

We trust this additional commitment will be accepted as completing our response and the violations can be closed out. Please feel free to contact me at our Casper office if you have any questions.

Sincerely,
Lost Creek ISR, LLC

John W. Cash
Vice President
