Subject: Question: Powertech's initial surety estimate

Good morning, Eric.

As you are probably aware, Powertech was required by license condition (LC) 9.5 to submit an initial surety estimate within 60 days of license issuance. The license can be found at ADAMS Accession # ML14043A052.

Powertech submitted its initial surety estimate by letter dated July 13, 2014. This letter can be found in ADAMS at ML14191A034. Powertech's initial estimate of \$1.62 million does not include ground water restoration since they have not begun operations. Powertech is also not required to have a surety instrument since operations have not commenced.

Have your folks had a chance to look at these numbers? We are in the process of responding to Powertech's license amendment request for the surety and I wanted to check with you.

Regards,

Ron
