January 26, 2015

Mr. Christopher G. Miller Director, Division of License Renewal Office of Nuclear Reactor Regulation U.S. Nuclear Regulatory Commission Washington, DC 20555-0001

**Subject:** Submittal of Industry Comments to Electrical Portions of the Draft Subsequent License Renewal (SLR) Generic Aging Lessons Learned (GALL) Report

**Project Number: 689** 

Dear Mr. Miller:

In a November 19, 2014, public meeting with the NRC, a request was made to provide industry feedback related to proposed changes to electrical portions of license renewal guidance to account for subsequent license renewal.

On behalf of the nuclear energy industry, the Nuclear Energy Institute (NEI)<sup>1</sup> is providing the attached information for NRC consideration. We appreciate the opportunity to have open discussions regarding the proposed changes to the electrical Aging Management Programs (AMP) for the new SLR GALL and want to continue the technical dialogue with the NRC staff.

If you have any questions, please contact me or Gary Peters (202-739-8105; gap@nei.org).

Sincerely,

Jason Remer
