Subject: MEDIA ADVISORY: SCE Admits to plotting nuke fail cover-up

Southern California Edison makes official admission of colluding with Peevey in nuke cover-up scheme

In a jaw-dropping official admission, SCE's spokesperson confirmed that Michael Peevey solicited the help of Southern California Edison Executives in planning a cover-up to kill an investigation into the \$5 Billion nuke failure and near-miss safety disaster at San Onofre.

This is what Southern California Edison's Media

Relations Project Manager Maureen Brown, said in a recorded interview on Friday:

"According to Mr. Picket, Mr. Peevey outlined key elements of what Mr. Peevey regarded as potential elements of a settlement of the Commission's investigation into the technical and shut-down issues at San Onofre."

The statement appears at minute 7:20 of a KBPS Television story on corruption at CPUC featuring an interview with Utility Fraud Investigator Maria Severson from the law firm of Aguirre & Severson.

It is obvious that Peevey was soliciting help from SCE in covering up his malfeasance (and SCE's) as outlined in yesterday's front page story in the San Diego U~T. Contact Charles Langley at (858) 752-4600 to arrange an interview.

Flawed San Onofre project steamed on
