Re: License Amendment NRC Material License 21-32793-01

To Whom It May Concern:

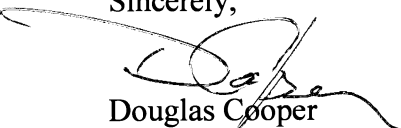

I would like to request an amendment to Radioactive Material License No.21-32793-01 for the possessing nuclear moisture density gauges and to add another office storage location.

OHM would like to acquire three additional InstroTek model 3500 Xplorer nuclear moisture density gauge for measurement of soils. These models are registered under the sealed source & device certificate NO. NC-1241-D-101-S. I would like to increase our NRC license Byproduct section 6D and 6E levels to the following m Ci levels:

1. Cs-137 (AEA Technology/QSA, Inc. Model No. CDC.85 or Isotope Product Laboratories Model No. HEG-137)
Maximum activity: 44 mCi
2. Am-241:Be (AEA Technology/QSA, Inc. Model No. AMNV.997 or Isotope Product laboratories Model No. Am1.NO2)
Maximum activity: 176 mCi

If you have any questions please feel free to call.

Sincerely,

Douglas Cooper
