Subject: Re: REQUEST FOR INFORMATION REGARDING THREATENED AND ENDANGERED SPECIES AND CRITICAL HABITAT FOR THE PROPOSED LICENSE TERMINATION FOR THE JEFFERSON PROVING GROUND FACILITY
Date: Friday, February 20, 2015 3:40:58 PM

Steve,

There have been no changes to the listed species and critical habitats in the JPG area since the initial request in January 2014. Therefore, the response we provided on February 19, 2014 via email is still valid.

Please let me know if I can assist you further.

Regards,
Marissa

Dear Ms. Reed,

In February 2014, you replied to the U.S. Nuclear Regulatory Commission's (NRC's) request for information regarding threatened and endangered species and critical habitat near the former Jefferson Proving Ground (JPG) munitions testing facility in Southeast Indiana near Madison, Indiana. The NRC's initial request dated January 29, 2014, and your response dated February 19, 2014, are attached to this email for your reference. The NRC is in the process of developing a draft environmental impact statement, and requests an update to the information you provided on listed species and critical habitats in the JPG area. After assessing the information provided by you, the NRC staff will determine what additional actions are necessary to comply with the Section 7 consultation process.

Please send your response to me by email at Stephen.Lemont@nrc.gov, or by regular mail at the address shown below. If you have any questions concerning this matter, please contact me at my email address or by phone at (301) 415-5163.

Thank you.

Sincerely,

Steve Lemont
