Subject: Acceptance Review: Dominion Fleet-Request for Approval of Cyber Security Plan (CSP) Revised Implementation Schedule.

By letter dated November 17, 2014, Virginia Electric and Power Company (Licensee) submitted a license amendment request (LAR) to revise the License Amendment Request for Dominion, Kewaunee, Millstone, North Anna, Surry (Dominion) Request for Approval of Cyber Security Plan (CSP) Revised Implementation Schedule. The proposed license amendment requires that all subsequent changes to the NRC-approved CSP implementation schedule be approved pursuant to 10 CFR 50.90. The purpose of this email is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of this LAR. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the NRC staff to complete its detailed technical review and make an independent assessment regarding the acceptability of the proposed request in terms of regulatory requirements and the protection of public health and safety and the environment. Given the lesser scope and depth of the acceptance review as compared to the detailed technical review, there may be instances in which issues that impact the NRC staff's ability to complete the detailed technical review are identified despite completion of an adequate acceptance review. If additional information is needed, you will be advised by separate correspondence.

If you have any questions, please contact me at 301-415-2597.

V. Sreenivas, PH.D., C.P.M.,
Dominion Fleet/North Anna Power Station
